As Calibration Repair Engineer you will be part of a team responsible for repairs, calibration and adjust a wide range of test and measurement equipment from a wide range of electrical and physical parameters. You will become an integral member of the team and make a significant contribution to business in achieving its ambitious business growth plans.

## Responsibilities

- To repair units to component level
- To provide detailed calibration certificates
- To source equipment specifications when necessary
- To look at ways of improving test techniques and increasing parameters.

- To maintain high quality levels throughout
- To provide the administration team with timely data
- To maintain and safeguard the integrity of test equipment and company standards.
- To maintain turn round times to a minimum level
- To keep a tidy and well-ordered environment

## KPIs

- Repair and calibrate a wide range of multi-parameter test equipment from a range of industry sectors
- Enter data correctly and update the job progression system
- Ensure customers' requirements are met
- Provide certificate details when calibration complete.
- Accurately recording personal activity against KPI's.

## Knowledge, Skills, and Experience Required

- HNC in electrical/electronic minimum or a similar discipline
- Or demonstrable qualification through experience
- Experience within the Instrumentation Industry or previous repair experience in an electrical electronic role.
- Must be able to repair to component level
