ELECTRICAL SAFETY TESTING
& MEASURING.

PAT Testing in Schools

**An automated solution for workplace testing, PPE
and risk assessment – in the palm of your hand**

The Apollo 600 is an all-in-one solution to recording and managing preventative maintenance within any educational establishment.

It integrates PAT testing with risk assessment and a built-in camera for visual evidence as well as a feature to allow any user-defined workplace test or inspection to be recorded – it's a total safety management tool.

PAT Testing

- Super fast and comprehensive PAT testing
- Retest frequency calculator
- Built-in camera for visual evidence
- Barcode data entry & label printing

General Health & Safety

- Log all workplace test & inspections
- User customisable test sequences
- Universal risk assessment tool
- Includes fire alarm and emergency lighting site reports

PATGuard 3 Software

- Compatible with Apollo 600
- Advanced data management and reporting for all health & safety matters
- Auto schedule upcoming tests and inspections
- Upload data to tester for faster retesting
- Network compatible

Apollo 600

Comprehensive PAT Testing

Provides a comprehensive range of electrical test functions to comply with the latest IET Code of Practice for in-service testing and inspection of electrical equipment. Handy features such as the built-in risk assessment and retest calculator make testing straightforward and an on-board camera allows visual evidence to be stored against test results.

Record any workplace test or inspection

The Apollo 600 is not just a PAT tester, it allows users to define their own parameters for any workplace test or inspection so that test data from all preventative maintenance regimes can be stored together using a single handheld instrument. This means that PPE checks, fire extinguisher inspections, emergency lighting, legionnaires, fire alarm call point checks and many more can be easily recorded and managed.

Saves you time and money

Designed with speed of use and efficiency in mind; this lightweight battery-powered tester is easy-to-use and combines features such as barcode data entry, label printing, auto scheduling and compatibility with PATGuard 3 asset management software to make health & safety management more efficient, saving on time and resources.

Takes the hassle out of paperwork

For secure data management, Apollo 600 is compatible with the network-

enabled PATGuard 3 software program, enabling comprehensive test data to be stored, saved, shared, sorted and analysed easily; reducing the risk of human error and providing time savings. Useful tools such as automatic test scheduling and fast upload of asset history to the Apollo 600 tester further speed up the testing process.
