

Job Title: Field Based Calibration Engineer (Yorkshire)

Department: Calibrationhouse

Reports Direct: Calibrationhouse Quality Lead

Location: Yorkshire and occasional trips to Ireland

Job Purpose

Job Type:	Permanent, Full time
Hours:	38 house per week, Monday to Friday
Start Date:	ASAP

As Calibration Field based Engineer, you will be part of a team responsible for test, calibrate and adjust a wide range of test & measurement equipment types from a wide range of electrical and physical parameters on customers premises in the UK and overseas (when required).

Responsibilities

- To provide detailed calibration certificates
- To source and understand equipment specifications when necessary
- To identify and share ways of improving test techniques and increasing parameters.
- To deliver a best-in-class service delivery

- To provide the administration team with timely data
- To always maintain a professional attitude
- To work flexibly to meet customers' requirements
- To always keep a tidy and well-ordered environment
- To follow documented procedures accurately
- To have a knowledge of specifications and measuring units used
- To discuss technical issues with customers
- To liaise with repair staff regarding faulty items.
- To liaise with admin staff regarding customer contact/requirements.
- To carry out calibration work back at base if required.

KPIs

- Obtain product specifications and maintaining a suitable library facility
- Calibrate a wide range of multi-parameter test equipment from a range of industry sectors
- Provide certificate details when calibration complete
- Enter data correctly and update the on-site job system
- Ensure customers' requirements are met
- Display a professional attitude when in front of customers
- Synchronise data within designated timescales
- Accurately recording personal activity against KPI's.
