

DO4A

Rugged, portable digital ohmmeter with digital calibration and 4,000 count

The DO4A is a practical instrument for low resistance measurement, ideal for use in the workshop, field or test facilities.

It is of rugged construction contained in an aluminium case with tilt handle. The DO4A has many advanced features, digital calibration and long scale length (4,000 count).

The rechargeable sealed lead acid battery means real portability with more than 14 hours continuous operation. Full measurement capability is maintained while charging. For ease of operation the control functions have been kept to a minimum and are clearly marked.

It is of course direct reading, warning LEDs illuminate when an open circuit lead condition is detected. Over range and low battery indication is also provided. The DO4A is supplied ready for immediate use with battery, mains cord and measuring leads, no extras are normally necessary.

The 15mm LCD provides easy viewing and the instrument can be used in any position for many and varied applications. The test leads provided have a length of 1m with spade tags for connection to the ohmmeter terminals.

They are terminated in combined current and potential probes that will accept conductor diameters up to 6mm.

Key Features

- True 4 wire measurement eliminates lead resistance errors
- 6 push button ranges 40m Ω - 4k Ω with long scale length
- 10 $\mu\Omega$ resolution on 40m Ω range
- Zero control thermal E.M.F. compensation
- Digital calibration
- Mains/rechargeable battery operation
- Open circuit lead warning
- Rugged industrial maintenance free design
- Universal mains supply 100/200/220/240V +10% - 13%

Ideal For

- Aerospace
- Drivers and electrical machines
- Military
- Manufacturing
- Utilities, electrical, water and gas

Measurement

4 terminal Kelvin/Thomson principle eliminates errors due to lead resistance

Display

15mm LCD 4000 count with automatic decimal point and polarity indication

Ranges

6 push button selected with LED indication

Terminals

4mm binding posts accept spade tags and 4mm banana plugs

Mains Supply

100/120/220/240V +10% to 13%
47 - 63Hz 20VA

Safety

EN 61010-1 EMC 61326

Calibration

Digital security key protected

Auto Zero

Permits the automatic zero of amplifiers and external circuits, eliminating errors due to thermal E.M.F.

Battery

6V 2.8Ah sealed lead acid battery with built-in charger. 14 hour typical operating time on lowest range, 28 hours typical on other ranges. Internal charger and automatic switch off.
